WILL YOU PARTICIPATE IN THE V-CHECK STUDY?

Help us understand how women can be better informed about cervical cancer.

In the Netherlands, ALL women can participate in the National Cervical Cancer Screening Program **free of charge.** We are investigating whether providing clear explanations helps you make an informed decision about this.

Please note: participating in our study is different from participating in the screening program itself. The RIVM advises doing that only *after* your delivery.

Who is it for?

You can participate if you:

- Are pregnant.
- Are 30 years or older.
- Have not yet participated (fully) in the population screening.

How can you participate?

Inform your midwife that you would like to participate.
You will receive a consent form via email.

What does it involve?

You will complete a questionnaire of +/-15 minutes twice, completely anonymously.

Some participants will also have a 15-minute information session with the midwife.

During pregnancy:
- Questionnaire 1
- Sometimes: Consultation

After the delivery:
- Questionnaire 2
